Purpose

SEGULA Technologies Tunisia (STT) is committed to protecting its information assets and those entrusted by customers, partners, and other stakeholders. This policy formalizes STT's approach to establishing, implementing, maintaining, and continuously improving its Information Security Management System (ISMS), in alignment with ISO/IEC 27001 and TISAX requirements.

This policy applies to all STT employees, contractors, systems, and information assets across all business units and sectors, including but not limited to engineering, industrial, and technological services.

Objectives

STT's information security objectives are to:

- Ensure the confidentiality, integrity, and availability (CIA) of information.
- Protect internal and external informational assets against unauthorized access, loss, or disruption.
- Fulfill applicable legal, regulatory, and contractual obligations.
- Embed security requirements across projects, services, and operations.
- Drive continual improvement of the ISMS.

Management Commitment

Top Management demonstrates its commitment by:

- Endorsing and supporting the ISMS and its continual improvement.
- Allocating appropriate resources for effective risk-based controls.
- Promoting a culture of accountability and security awareness.
- Ensuring that security requirements under ISO/IEC 27001 and TISAX are addressed across relevant business functions.

Monitoring & Privacy

Use of STT's information systems may be monitored for security and compliance purposes. Monitoring of information systems is conducted in accordance with applicable laws and internal policies.

STT respects user privacy and ensures that any personal data processing is carried out lawfully, transparently, and for legitimate purposes.

Information Handling & User Responsibilities

All users must handle information in accordance with company classification rules, confidentiality agreements, and contractual obligations. Internal and client information shall be protected unless otherwise agreed upon. All users are responsible for complying with security procedures and for reporting any incidents or suspected threats.

Training & Awareness

STT maintains a continuous awareness program to ensure that all personnel understand their information security responsibilities and contribute to a secure working environment.

Review & Improvement

This policy is reviewed periodically and upon significant changes in business context or regulatory requirements. It reflects lessons learned, audit outcomes, and changes in the threat landscape.

This policy is approved and endorsed by STT Top Management, and it shall be strictly enforced across STT. Any deviation observed thereof shall be treated according to the HR policy. The same shall be communicated within STT and available to interested parties, as appropriate
